

# **Installation and Registration of ScienceWord 6.0 / Class 6.0**

**Web site: [www.scienceoffice.com](http://www.scienceoffice.com)**

## I - Installation

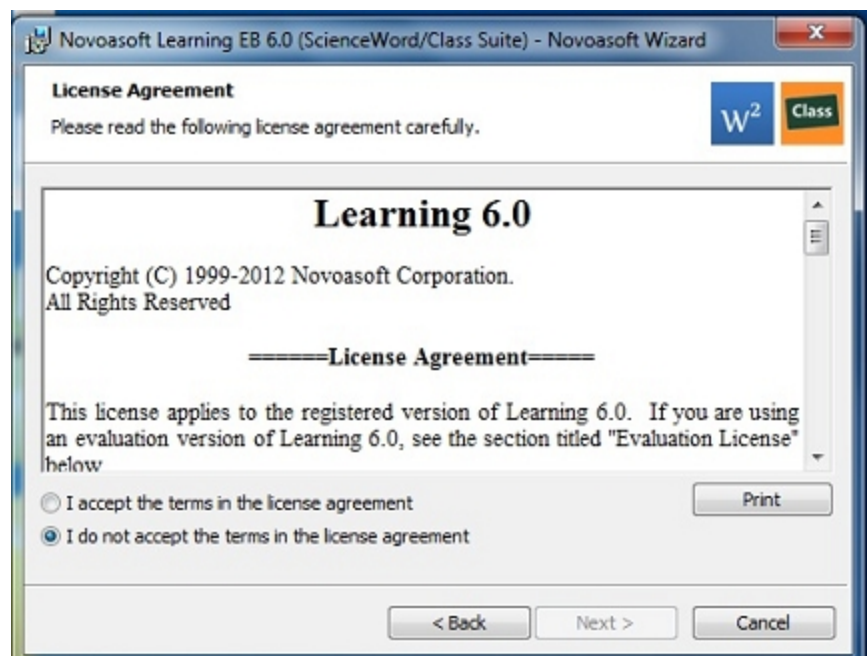

i) Insert the CD into the computer's CD drive.

The installation starts automatically with the appearance of the window below

click on "*Next*"

ii) The following window then appears

Tick off the box "*I accept the terms in the licence agreement*" as shown below

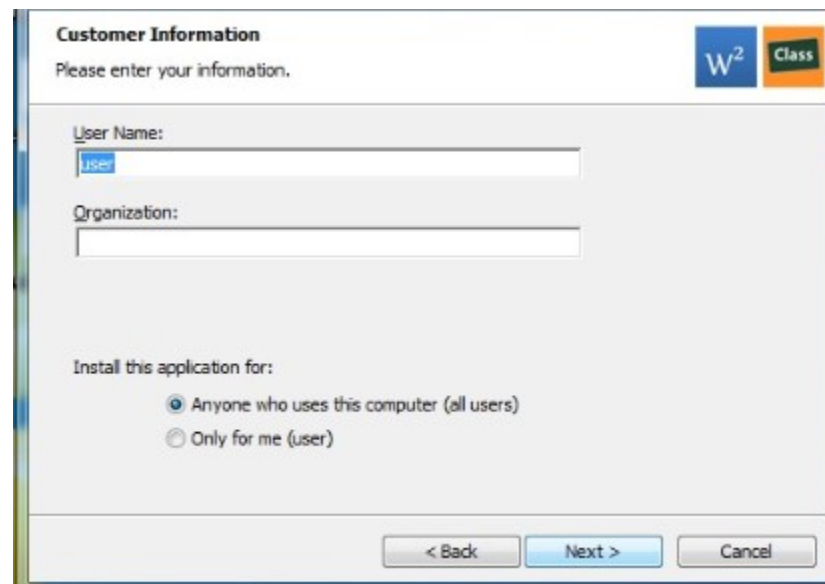

iii ) Then following window appears

The window is titled "License Agreement" and includes a "W<sup>2</sup> Class" logo in the top right corner. Below the title, it says "Please read the following license agreement carefully." The main content area displays "Learning 6.0" in a large font, followed by "Copyright (C) 1999-2012 Novoasoft Corporation. All Rights Reserved". A section header "====License Agreement====" is centered. Below this, a paragraph states: "This license applies to the registered version of Learning 6.0. If you are using an evaluation version of Learning 6.0, see the section titled 'Evaluation License' below". At the bottom of the content area, there are two radio buttons: "I accept the terms in the license agreement" (which is selected) and "I do not accept the terms in the license agreement". A "Print" button is located to the right of these options. At the very bottom of the window, there are three buttons: "< Back", "Next >", and "Cancel".

Then click on "*Next*"

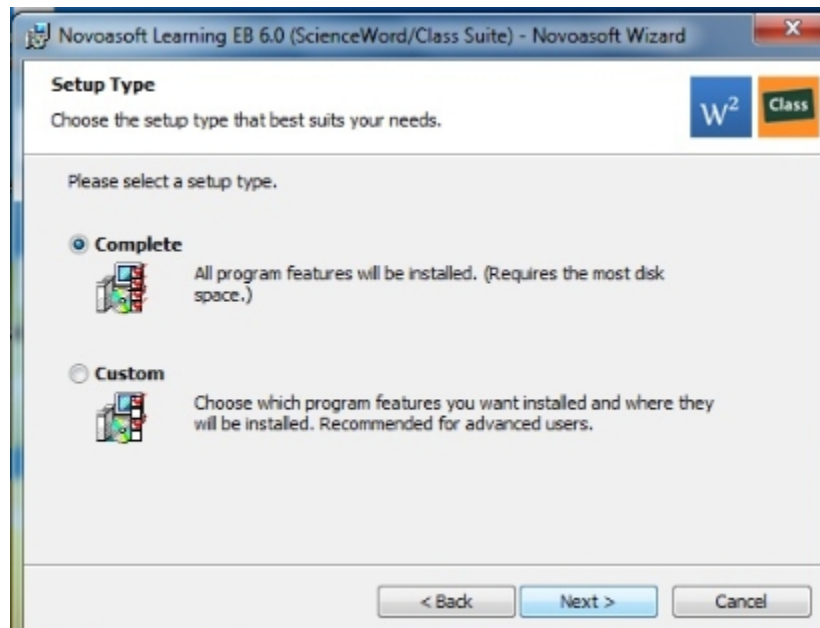

iv ) The following window appears

The window is titled "Customer Information" and includes a "W<sup>2</sup> Class" logo in the top right corner. Below the title, it says "Please enter your information." The main content area has two input fields: "User Name:" with a text box containing the word "User", and "Organization:" with an empty text box. Below these fields, it says "Install this application for:" followed by two radio buttons: "Anyone who uses this computer (all users)" (which is selected) and "Only for me (user)". At the bottom of the window, there are three buttons: "< Back", "Next >", and "Cancel".

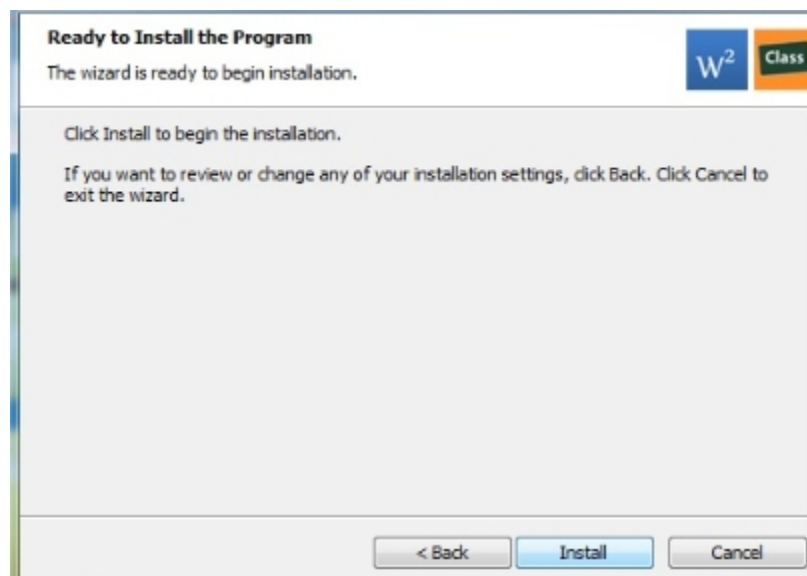

Click on "*Next*"

v) The following window appears

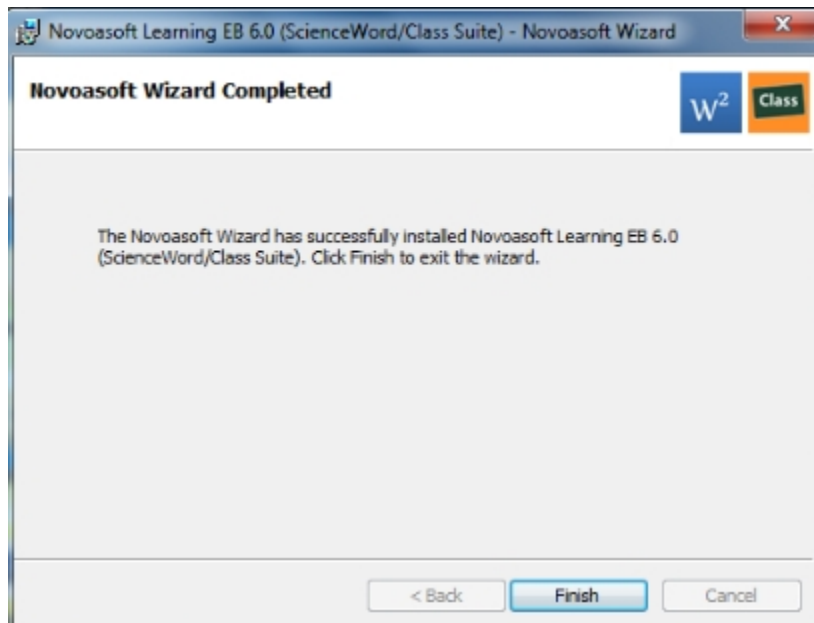

The "**Complete**" option is ticked off. Then click on "**Next**"

vi) The following window appears

Click on "**Install**".

vii) At the end of the installation, the window below appears; click on "**Finish**" to end the installation.

Then the following three icons appear on the Desktop:

**ScienceWord 6.0**

**Class 6.0**

**Skill 6.0.**

## II) Registration modes

Note that there are two registration modes to the usage of the software **Class 6.0** and **ScienceWord 6.0**. The first is through a registration number and the second, through the USB Encrypted Device. You just need **one kind** of license: the one using the **Serial number** or the one using **USB encrypted device**.

The first one that is using a common license serial number is registered through internet on a single computer. The second one uses an USB encrypted device as common license. You can use it on any computer where any version of **ScienceWord** and **Class** are installed.

Note that **Skill 6.0** does not require any registration.

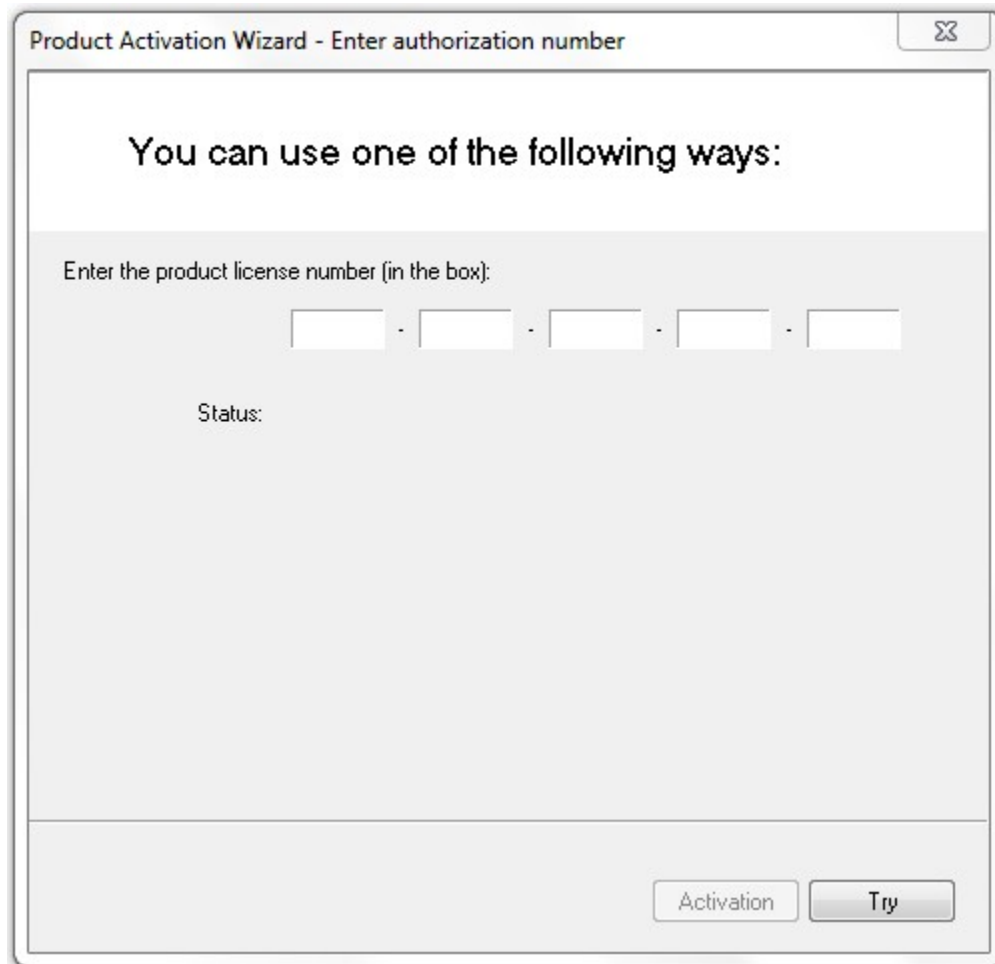

### 1) Using serial number as license

To get the registration of ScienceWord or Class through serial number, **make sure that you are connected to Internet** and double-click on the icon to open the application. Then the following dialogue box opens to get you registered. All you have to do is to **insert the same serial number** and then click on "Activate" button that becomes available. Just wait a while to see the confirmation of the activation message.

Later, a reinstallation of the software on the same computer **using the same hard disk**

will not require a registration number if the **operating system** have not been changed

But when you are **using a new hard disk or operating system**, then you **need to acquire a new registration number**.

By clicking on "Trial" button, you can go on with trial version of ScienceWord and Class software without being able to save your document.

## 2 ) Using encrypted device USB as license ( security key )

This registration mode requires the use of an USB encrypted device ( Novoasoft security key ) . Just insert the USB encrypted device into the USB port of the computer and then wait for it to be recognized by the computer. When the installation is done, a **stable (unblinking)** light appears on the USB device. The same USB device can be used on any computer where the software is installed.

The user should always make sure that the USB key is **well plugged into the central unit** of the computer **before opening** ScienceWord or Class programs.

It could happen that you forget to plug the USB device when working. That means you **are not** working under license.

But any new page you open with " Create new page" button from the standard toolbar or through the short key "Ctrl +N", belongs to a group of non registered files.

Then, when this happens, just plug the USB device to the computer port and double-click on the program icon (  or  ) being used. Then copy your previous work to the file newly created and save it. Then close the other file that has been opened without the use of the USB key.

### Note

- With "Windows 98 Second Edition ", it can happen that an installation window for a peripheral device opens up; please follow the instructions up to the end.
- *Generally, when an update of this version is done, no problem arises.*
- With Windows 2000, Windows Millennium, XP and other versions, the installation is automatic. It can happen that Windows restarts in order to make the installation effective.

#### Remark:

*If the light does not shine or if it **blinks**, then the installation of the USB device is not effective. The case may then be that the USB port of the computer is defective.*

*You cannot save a document without that USB device key.*

## III - Updating and upgrading policies

### 1 ) The case of USB encrypted device

You can always use the USB key for any **higher version** of ScienceWord and Class.

### 2 ) The case of registration number

You don't need to pay any additional fee for **updating** ScienceWord and Class **when using registration number license**. But **any upgrading** may require a new payment.
